

Fishing Rod Holder

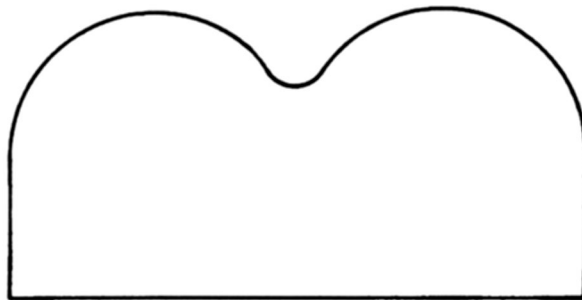

Oklahoma Cooperative Extension Service • Division of Agricultural Sciences and Natural Resources

Build this rod holder for your fishing rods and you will not have to store them in a corner or lean them up against a wall. The rod holder will provide a neat storage place for your valuable fishing rods.

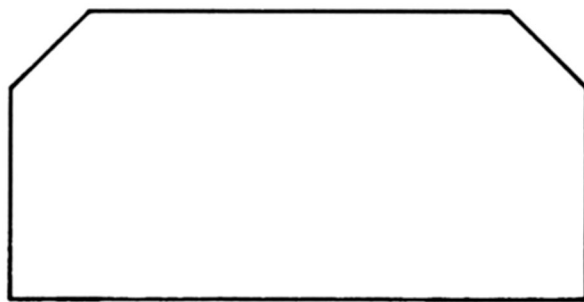

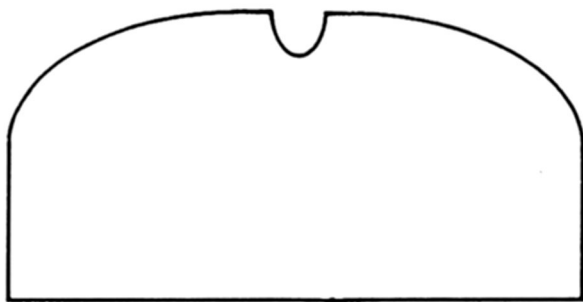

If you plan on leaving your reels on the rods, be sure to increase the dimension between the slots to 2 1/2". This will provide enough space for the rods and reels. The small piece, which is 3/8" by 1 1/4" plywood or other suitable material, is used to prevent the rods from slipping out of the slots. Drill

a small hole in one of the plywood stops and nail it to the rod holder with a finished nail. A small brad is then nailed on the rod holder to hold the plywood stop in place. Be sure to nail and glue the slotted piece of the rod holder to the front piece.

The cutout at the upper left corner of the back page can be used to decorate the front of your rod holder. Use other designs of your choice or small decals for decorations. Finish the rod holder to match the colors in a room or use a natural finish.
